

Our Process

PHASE 1

The design consultation is where we discuss your vision, goals, timeline, budget and expectations. We believe a successful project starts with clear communication to ensure your needs are met.

PROPOSAL

We will present you with a plan outlining the project scope and estimated design fees. Upon approval of the agreement and required retainer, we reserve a start date to begin your project.

PROJECT SURVEY ANALYSIS AND TRADE DAY

This step we schedule time to visit the site to take measurements photos and schedule any tradespersons involved in the project.

PHASE 2

We will present your design concepts and elevations to communicate the desired vision. This will include furniture layout, furnishings, accessories, flooring, lighting, color recommendations and finishes.

PHASE 3

Procurement and Project management - This is where we set things in motion as we visit showrooms, and vendors to source items for your plan. We manage and coordinate deliveries and trade professionals overseeing the process from concept to completion.

INSTALLATION

The most exciting stage of the project is the installation. While you are away, we coordinate and manage all the details of your design plan with the hope of exceeding your expectations.

THE REVEAL

We plan the walk through and point out the enhancements made to your home. A follow up photo shoot is typically scheduled soon after to capture the essence of your transformed space.
